

Kaposi Sarcoma (KS)

UCSF Helen Diller Family
Comprehensive
Cancer Center

The **UCSF Patient and Family Cancer Support Center** is the hub of support, information and resources for people with cancer at the **Helen Diller Family Comprehensive Cancer Center**. Learn more about UCSF's supportive care programs at <https://cancer.ucsf.edu/support/crc/patient-support-center>

The **Cancer Support Center at Mission Bay** is located at 1825 4th St., 1st Floor, Room M-1210. The **Cancer Support Center at Mt. Zion** is located at 1600 Divisadero St., 1st Floor, Room B-101.

The complete list of Patient Education Resource Pages is available to view at <http://cancer.ucsf.edu/support/crc/patient-education-resources>

Overview

Kaposi's sarcoma (KS) is a disease in which cancer or malignant cells are found in the tissues under the skin or mucous membranes that line the mouth, nose and anus. Until the early 1980s, Kaposi's sarcoma was a very rare disease found mainly in older men, patients who had organ transplants or African men. With the AIDS epidemic in the early 1980s, doctors began to notice more cases of Kaposi's sarcoma in Africa and in gay men with AIDS. Kaposi's sarcoma usually spreads more quickly in these patients. The chance of recovery depends on what type of Kaposi's sarcoma you have, your age and general health, and whether or not you have AIDS. Although KS often responds well to treatment, recurrent disease is common. This means that KS will likely recur after it has been treated. It may come back in the area where it first started or in another part of the body. Website: <https://www.ucsfhealth.org/conditions/kaposis-sarcoma>

UCSF Resources

UCSF Sarcoma Center

Soft tissue and bone cancers are a rare and diverse group of tumors collectively known as sarcoma. At the UCSF Sarcoma Center, we take a collaborative and multidisciplinary approach to combat these complex cancers. Our dedicated team of sarcoma specialists provide patients with the most precise diagnostic tools, novel surgical and reconstructive techniques, and promising new therapies. The UCSF Sarcoma Center includes specialists from: Orthopedic Oncology, Radiation Oncology, Radiology, Pediatric Oncology, Surgical Oncology, Adult Medical Oncology, Pathology and Thoracic Surgery. In addition to our superb clinical care, the UCSF Sarcoma Center is the premier Bay Area institution for cutting-edge basic and translational sarcoma research. Through our collaborative research, we are pushing the scientific boundaries to develop new therapies to improve outcomes for patients with sarcoma.
